PROTECTION IN SECONDS!

With this approach anyone can instantly provide the necessary “distancing mechanism” at an affordable price.

With a simple clip, the face shield easily attaches to the bill of most baseball caps and prevents splash and droplets from depositing on the user's face. CapShields do not include the baseball cap.

In addition to medical personnel, many people in “front line” industries such as delivery personnel, restaurant workers, and anyone who needs to work within the proximity of others, require the ability to “distance themselves” while in close proximity.

This is best accomplished by wearing CapShields, which provide an optically clear barrier and can prevent droplet and splash contact with the users' face.

CAPSHIELDS
WE'VE GOT YOU COVERED

THE CURRENT PROBLEM:

Because typical face shields require an adjustable headband with a foam barrier to prevent inadvertent droplet contamination and a method of head size adjustment, they are complicated and more costly than need be for these applications.

THE CAPSHIELDS SOLUTION

Given that most people in the aforementioned professions own and wear baseball caps, it became apparent that the cap itself can serve as an ideal base for a simple and low-cost face shield.

GENERAL PRODUCT DESCRIPTION

CapShields consists of a plastic molded visor clip that attaches directly to the front of the cap bill. Attached to the clip is a clear plastic face shield that provides full-face coverage. The shield is available in two versions, standard and anti-fog.

Molded into the clip is the company information, website and phone number for reordering.

CapShields is sold unassembled and in a sealed plastic bag along with an instruction card. This provides for a flat package that can be easily shipped singularly or in multiples.

The face shield snaps easily into the clip.

ORDERING INFORMATION

STANDARD

P/N CV0010-1 CV-19 Face Shield with Clip **\$12.95 each**

P/N CV0011-1 CV-19 Replacement Face Shield **\$5.95 each**

Questions/Customer Service: 978-998-4281

Both the standard and anti-fog version of the replacement shields fit the universal Capshield clip.

Order at www.capshields.com

CapShields do not include the baseball cap.
Orders prepaid via valid credit card and PayPal.

*Applies to both standard and anti-fog versions

Step 1:

Remove the visor clip and the shield from the bag.

Step 2:

Remove the protective plastic from one side of the shield. **This will be the inside of the shield when in place.**

Step 3:

Making sure the clip is held so the printing is at the top and starting at one end of the clip, insert the post into the end hole of the shield.

3.1: Make sure the inside of the shield has the protective sheet **removed** and the protective sheet remains on the outside. **Do not remove the outside protective sheet yet.**

3.2: Work your way around the front of the clip, progressively inset the posts until they are all inserted into the holes. The holes are intentionally elongated so be sure to pull the shield as you work your way around so it does not slip off the post.

3.3: Smooth out the face shield so it sits firmly on the front edge of the visor clip.

3.4: You should now have the shield attached to the clip with the printing on the top.

NOTE:

When done properly, there should be no gaps between the shield and the clip.

Step 4:

Select a cap. If the visor is not flat and is significantly curved, it must be straightened out in order to put the visor clip in place. Try and select a cap with the flattest bill possible to ease installation.

Try and flatten the bill of the cap for CapShields to fit properly

Step 5:

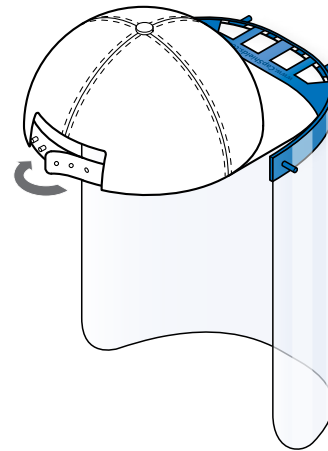

Slide the visor clip over the front of the bill of the cap until it is fully in position. Take care to minimize the gap between the visor clip and front edge of the bill as an open gap may allow splash or droplets to fall through.

**Step 6:**

Carefully remove the outside protective plastic.

**Step 7:**

Adjust the headband of the baseball cap for a comfortable fit.

**NOTE:**

Fogging can occur while wearing the CapShields in cold weather. Use an anti fogging spray if this happens. Do not use if vision is compromised.
